

# Anatomy and Physiology

## With Pathophysiology

For the Aromatherapist, Herbalist, and other wellness practitioners

THE SCHOOL FOR  
AROMATIC STUDIES

# Table of Contents

<b>Module One: Building Blocks of Life</b>	<b>8</b>
<b>Lesson 1: Introduction to core concepts and teaching approach</b>	<b>11</b>
What are Anatomy and Physiology?	11
Pathology or Pathophysiology?	12
<b>Lesson 2: Introduction to the human body</b>	<b>13</b>
The chemical level of organization	14
The cellular level of organization	14
The tissue level of organization	14
The organ level of organization	15
Organ systems chart	15
Basic processes of life	16
Metabolism	17
Responsiveness	18
Movement	18
Growth, repair, and reproduction	19
<b>Lesson 2b: Homeostasis</b>	<b>20</b>
Homeostasis: the balance of life	20
Feedback systems	21
Homeostasis in body fluids	23
Aging and homeostasis	23
Allostasis	24
Traditional concepts of homeostasis	25
The living organism	26
<b>Lesson 3: Cellular level of organization</b>	<b>27</b>
The human cell	28
The plasma membrane II	29
The lipid bilayer	30
Proteins in the cell membrane	31
Specialized surface structures	32
Healing and permeability	34
<b>Lesson 4: The Cytoplasm</b>	<b>35</b>
The cytoskeleton	36
Organelles	39
Homeostasis and disease	41
The nucleus	43
<b>Lesson 5: The Destiny of cells</b>	<b>45</b>
Cellular diversity	45
Cell division	46
Apoptosis	51

<b>Lesson 6: The Tissue level of organization</b>	53
Introduction	53
How cells form tissues	55
Tissues and their functions	57
Epithelial tissue	57
Glands	60
Connective tissue	61
Muscle and nerve tissue	63
Membranes	64
Tissue repair, aging, and homeostasis	66
<b>Module Two: Physical Barrier</b>	68
<b>Lesson 1: Introduction to the skin</b>	70
The epidermis	71
Cells in the epidermis	75
Accessory structures of the skin	77
The dermis	83
The hypodermis	84
<b>Lesson 1a: Function of lipids in the skin</b>	85
Transepidermal water loss	87
<b>Lesson 2: Functions of the skin</b>	89
Functions of the skin	89
Absorption	89
Elimination	91
Thermoregulation	92
Vitamin D synthesis	94
Somatosensation	96
Pain	97
Itching	98
Vibration	99
Skin: a homeostatic regulator	99
<b>Lesson 3: Wound healing and tissue repair</b>	100
<b>Lesson 4: The dermal microbiome</b>	102
<b>Lesson 5: The endocrine system and the skin</b>	104
<b>Lesson 6: The endocannabinoid system and the skin</b>	106
Homeostasis gone awry	107
<b>Lesson 7: Skin and the aging process</b>	109

<b>Module Three: The Fuel of Life: Digestion</b>	<b>111</b>
<b>Lesson 1: Introduction to the digestive system</b>	113
The basic processes of digestion	115
<b>Lesson 2: The mouth and salivary glands</b>	117
<b>Lesson 3: The pharynx and esophagus</b>	123
<b>Lesson 3b: Tissue layers: esophagus to large intestine</b>	126
Sprout: The enteric nervous system	128
<b>Lesson 4: The stomach</b>	132
<b>Lesson 5: The small intestine</b>	136
<b>Lesson 5a: The liver and gall bladder</b>	141
<b>Lesson 5b: Absorption of nutrients &amp; the small intestine</b>	144
<b>Lesson 6: The large intestine</b>	146
The intestinal microbiome	150
<b>Module Four: Movement</b>	<b>152</b>
<b>Lesson 1: Introduction to musculoskeletal system</b>	<b>154</b>
Bones	154
Bone cells	157
Bone remodeling	160
Bone repair	160
Bone resorption	161
<b>Lesson 1b: Homeostasis gone awry</b>	161
<b>Lesson 2: Muscles</b>	163
<b>Lesson 2b: ATP and the muscles</b>	167
<b>Lesson 2c: Mechanisms of muscle damage, repair, and regeneration</b>	169
<b>Lesson 3: Connective tissue</b>	172
Ligaments	172
Tendons	173
Joints	174
Fascia	174
Adipose tissue	175
<b>Module Five: Transportation &amp; Vitality</b>	<b>177</b>
<b>Lesson 1: Introduction to the cardiovascular system</b>	179
<b>The heart: the engine of movement</b>	180
<b>Lesson 2: Cardiovascular circuits: the movement of blood</b>	183
Circuits: The pathways blood can take	184
Pulmonary circulation	184
Systemic circulation	186
Coronary circulation	187
<b>Lesson 3: The heart's electrical system</b>	188

Cardiac cycle: the rhythm of the heart	191
Cardiac metabolism	191
<b>Lesson 4: The blood</b>	192
Red blood cells transport oxygen	193
White blood cells: protection and defense	194
Platelets: forming clots to staunch bleeding	195
Plasma	195
Functions of blood	196
Tissue repairs	198
<b>Lesson 5: Blood vessels transport blood</b>	200
Arteries	202
Capillaries	205
Veins	208
<b>Module Six: Protection and Survival</b>	<b>211</b>
<b>Lesson 1:</b> The lymphatic system	213
<b>Lesson 2:</b> Role of lymphatic system in immunity	216
Adaptive immunity	217
T-cells	218
B-cells	220
Natural killer cells	222
<b>Lesson 3:</b> Lymphoid organs	223
Thymus	223
Bone marrow	225
<b>Lesson 4:</b> Secondary lymphoid organs	227
Lymph nodes	227
Spleen	228
Mucosa-associated lymphoid tissues (MALT)	229
Peyer's patch	229
Appendix	230
Tonsils	231
<b>Lesson 5:</b> Transport of dietary lipids	233
<b>Lesson 6:</b> The immune system	234
Introduction	234
What is the immune system?	235
The Immune communication system	235
How the immune system works	236
About Innate immunity	236
Cells of the innate immune response	237
The over-all goal: inflammation	239
About Adaptive immunity	241
The immune response at work	243
Humoral   antibody-mediated immunity	244
Essential oils and the immune system	246
Stress and immunity	247

<b>Module Seven: Breath of Life</b>	<b>249</b>
<b>Lesson 1: Introduction</b>	251
The lungs	254
Gas exchange	257
<b>Lesson 2: Respiratory defense system</b>	259
Cilia	260
Mucus: the good, the bad, and the sticky	260
Alveolar macrophages	261
Expectoration	261
Lesson 3: pH regulation	262
Lesson 4: Posture, breath, and the stress connection	263
<b>Module Eight: Communication</b>	<b>265</b>
<b>Lesson 1: The Nervous system</b>	268
Introduction to the nervous system	268
Functional units of the nervous system: neurons	270
Types of neurons	272
How neurons fire: The nerve impulse	273
Communication between neurons	273
Neurotransmitters	274
Neurotransmitters: Links between the nervous system	275
Common neurotransmitters and their functions	276
Essential oils and neurotransmitters	278
<b>Lesson 2: The Central Nervous system</b>	280
The Central Nervous System (CNS)	281
The Human Brain	282
The Cerebral Cortex	283
Spinal cord	286
Blood Brain Barrier	288
Neurodegenerative Disorders	289
Alzheimer's disease	289
Parkinson's disease	290
The Limbic System	290
Essential Oils and the Nervous System	292
Mental Illness	294
Schizophrenia	294
Depression	295
Debunking the 'Chemical Imbalance' Myth	296
Inflammation and Mental Health	297
Neurodiversity: Difference, Not Disorder	298
Other Neurological Disorders	299
<b>Lesson 3: The Peripheral Nervous system</b>	302
The Peripheral Nervous System (PNS)	302
The Somatic Nervous System (SoNS)	304
The Autonomic Nervous System (ANS)	307
The Sympathetic Nervous System (SNS)	307

The Parasympathetic Nervous System (PSNS)	307
The ANS: Physical or Psychological Stress	310
Summary of the ANS	310
The Enteric Nervous System (ENS)	311
<b>Lesson 4: The Endocrine system</b>	314
Introduction to the Endocrine System	314
The Hypothalamus	316
Exploring Other Endocrine Glands	317
The Pituitary	317
The Adrenal Glands	318
The Thyroid Gland	319
The Parathyroid Glands	319
Other Endocrine Glands	320
Conclusion	320
<b>Module Nine: Elimination and Homeostasis</b>	<b>322</b>
<b>Lesson 1: Introduction to the urinary system</b>	323
Anatomy of the urinary system	324
<b>Lesson 2: Mechanism of filtration</b>	327
<b>Lesson 3: Kidney functions – part II</b>	329
<b>Lesson 4: Urinary excretion</b>	330
<b>Module Ten: Species Survival</b>	<b>334</b>
<b>Lesson 1: Introduction to the reproductive system</b>	335
<b>Lesson 2: The male reproductive system</b>	336
<b>Lesson 3: The female reproductive system</b>	342
<b>Lesson 3b: The menstrual cycle</b>	350
<b>Lesson 3c: Menopause</b>	353
<b>Lesson 3d: The female reproductive system – Part II</b>	354
<b>Conclusion</b>	358
<b>References</b>	<b>359</b>
